

# Winter Pet Tips

## Watch the water!

Your animals still need to drink plenty of water during winter, so continue to keep an eye on their water bowls. They may freeze over so you will need to refill them with fresh, clean water.

## Provide warm, dry shelter.

Just like people, animals need places where they are sheltered from wind, rain, and cold weather. It is a good idea to make sure your animals are not housed on the damp, cold ground during winter – consider raised beds or a shelter which is raised off the ground. Your animal's shelter must be as comfortable as possible.

Bedding should be soft, warm, dry, and cleaned regularly.

## Bedding.

Make sure your animals have snugly, warm blankets and cosy beds to keep them warm during the winter months.

Raised beds for dogs are usually best, as they will keep your dog dry and away from the cold, damp ground.
